

# Understanding Metrics

Last Modified on 11/21/2024 9:22 am EST

Applies To:  PoliteMail Desktop  PoliteMail Online  PoliteMail O365

Version:  4.94  4.97  5.x

The most common type of chart you will see when viewing a Metrics Report in version 5 is the pie chart. Each of these shows various metrics, defined in the glossary below.

Chart Guide

If you sent the message using Individual Measurement, you can click on any metric and get a list of recipients who interacted with the message.

- The outer circle represents the value on the report you are viewing.
- The inner circle represents your company average.
- The large center percentage is the metric for the report.
- The smaller percentage is the metric for the company average. A triangle pointing up (▲) indicates the message performed better than the average, and a triangle pointing down (▼) indicates the email performed below the average.
- The percentage to the right of the triangle shows the amount of the variance.

If exporting your results report to Excel, you may see more fields than what displays on screen. You can find a more detailed description of each field [here](#).

## Metrics Glossary

Term	Definition
------	------------

Term	Definition
Attention Rate	<p>Of the people who have opened the message, the percentage of viewers who read more than 3 seconds.. Low attention rate indicates issues with the subject line, time and date sent, or from address.</p> <ul style="list-style-type: none"> <li>• The <i>Audience Attention Rate</i> is the Opens (minus Ignored) divided by Delivered.</li> <li>• The <i>Open Attention Rate</i> is the Opens (minus Ignored) divided by the Sends. (This actually measures how many recipients did not ignore the message; the Attention Rate versus total Opens, rather than Sends, is included in Account and Campaign reporting).</li> </ul>
Average Read	<p>The average read time of the message:</p> <ul style="list-style-type: none"> <li>• The <i>Desktop Avg Read</i> is the average read time on computer.</li> <li>• The <i>Mobile Avg Read</i> is the average read time on mobile device.</li> </ul>
Average Read Time	Sum of Read Time / Read Count. Average of all Reads in time (excluding ignored and left open).
Click Thru	<p>The percentage of sent messages where a recipient clicked on a link in the message</p> <ul style="list-style-type: none"> <li>• The <i>Desktop Click Thru</i> is the click thru rate from computer</li> <li>• The <i>Mobile Click Thru</i> is the click thru rate from mobile device</li> </ul>
Click Thru Rate	Clicks / (Sent - Undeliverable). A <i>click</i> is an individual recipient (unique devices in aggregate) who clicks at least one link in the email message.
Content Utilization	Clicked URLs / Total URLs. The ratio of unique URLs clicked to unique URLs included in message.
Desktop	Email accessed via desktop/laptop computer, as identified via browser user agent.
Device Opens	Unique devices tracked (devices identified via browser agent)
Didn't Click	Individual recipients who did not click any links in the message.
Didn't Open	No data recorded, message not opened, or images/content not downloaded.
Effective Rate	Click Thru Rate / Opens. <i>Effective Rate</i> is the ratio Clicks to Opens, which indicates how effective the call to action was at getting clicks, counting only those you know had an opportunity to see it (opens). It excludes the recipients who ignored the email and measures the recipients who both opened the email and clicked a link.
Engaged Reads	Individual recipients who had the message open for over 50% of the content length. Sums all non-ignore opens by individual recipient. This metric is taken from those who have opened the email.
Engagement Rate	Takes into account both the average amount of time spent reading the message compared to the calculated time to read and the unique click rate. See <a href="#">this article</a> for details on Reach, Readership, and Engagement.
Ignored	Individual recipients who opened but had the message open for less than 3 seconds. (of unique devices in aggregate)
Images	Image count in message
Left Open	A read time of over 150% of the Time to Read is considered left open.
Likely Forward	Tracked messages which were opened by 3+ unique devices.
Mobile	Email access via a mobile device, as identified via browser user agent.

Term	Definition
Multiple Clicks	Individual recipients (unique devices in aggregate) who clicked more than one link (or same link more than once)
Multiple Opens	Count of individual recipients with more than one open of more than 3 seconds in duration (less than 3 seconds is a quick preview and not counted) that occurred more than 7 seconds apart from the previous open. This time period is configurable using the MultipleOpensWindow app setting.
Multiple Reads	Individual recipients who had more than one read (greater than 30% time open)
Open Rate	Opens / (Sent - Undeliverable). An <i>open</i> occurs when the message content (tracking image) is requested from the PoliteMail Server. Opens are a unique count of messages opened at least once, by individual recipient (by unique device in aggregate) out of total number of sends. This includes messages previewed in the reading pane in Outlook.
Out of Office	Out-of-office replies (returned to a mailbox PoliteMail is monitoring). Does not work with Aggregate tracking.
Opt-Out	Opt-out or unsubscribe actions taken on this message.
Opt-In	Opt-in (to a PoliteMail subscription list)
Percent Read	The Average Read Time divided by either the Report's Minimum Engagement Rate (20,000) or Time to Read, whichever is greater.
Reach	The ratio of your audience opened the message compared to the total sent. See <a href="#">this article</a> for details on Reach, Readership, and Engagement.
Read Rate	Reads / (Sent - Undeliverable). A <i>read</i> is an individual recipient who had the message open for at least 30% of the content length, calculated by the number of words in the email. It is the sum of all non-ignore or skimmed opens.
Readers %Read	Average non-ignored read time / Time to Read. This shows how much time those recipients that did not ignore your message spent reading it, compared to the calculated read time.
Readership	The amount of time spent by your audience to view and read the message. A Readership Rate is the ratio of the time spent reading the message to the calculated read time. See <a href="#">this article</a> for details on Reach, Readership, and Engagement.
Replies	Individuals who replied to the message
Sent	Total recipients message was addressed to (count of members in any lists)
Skimmed	Individual recipients who had the message open for less than 30% of the calculated time to read.
Time to Read	The calculated time to read entire message content at 200 words per minute (wpm).
Total Clicks	Total count of all clicks (non-unique count)
Total Links	Total links included in the email message
Total URLs	Total unique URLs included in the email message
Undeliverables	Hard bounces (returned to a mailbox PoliteMail is monitoring). Does not work with Aggregate tracking.
Views	Total number of all previews/opens (non-unique, total open count)
Words	Word count in a message
