

How do I send from a different email address?

Last Modified on 09/15/2022 11:08 am EDT

Version:  4.94  4.97  5.0+

Outlook for the Desktop: Compose a new email and click on **Options > From**.

PoliteMail Online: Click the 'From' link in the upper right.

PoliteMail for Outlook 365: Compose a new email, click on the ... button to view options, and select 'Show From'.

This should generate the From field above the To field where you should see your email address.

Click the From field, then click Other Email Address where you can enter the email address you are looking to have it sent from.

Note that you must have [Send From permissions](#) in PoliteMail to use this when sending a measured message.
