How to Use Direct Replies To
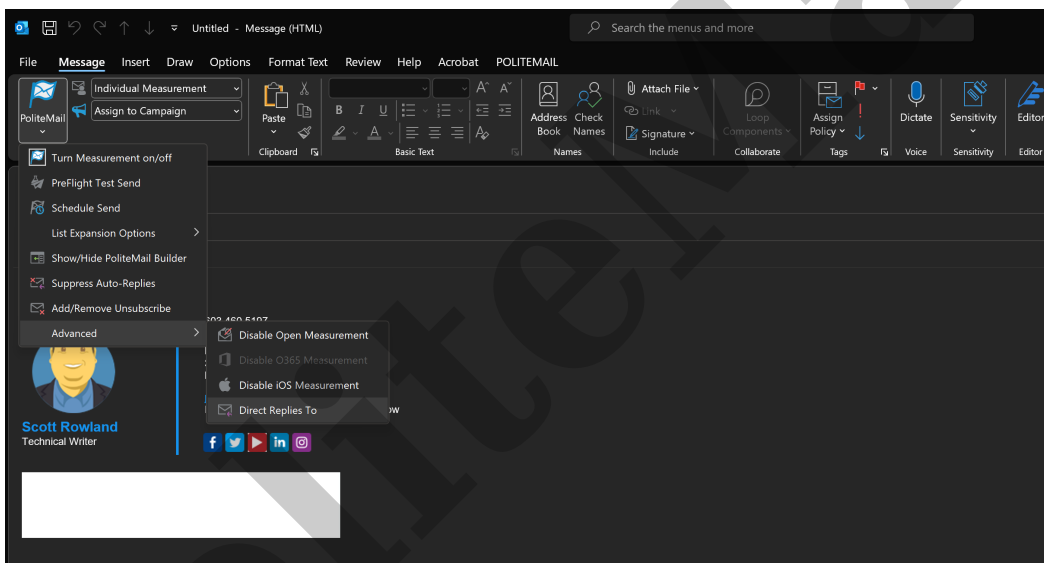

Last Modified on 07/06/2023 1:36 pm EDT

Applies To: ■ **PoliteMail Desktop** ■ **PoliteMail Online** ☐ PoliteMail O365
Version: ■ **4.9** ■ **5.0** ■ **5.05**

A user can specify a different inbox for bounces to be returned to. Using this method, you can keep one sending account free from any undeliverables, and use a separate sending account to monitor bounces.

1. Open a New Message in PoliteMail. Under the PoliteMail flag pull-down menu, choose **Advanced** > **Direct Replies To** (**Return Path** in v4.9).

2. Now specify which email address from your Global Address Book you'd like the bounces to be returned to. Check **Set as default** if you always want bounces to go to this address.

This message will now be sent from the 'Communications' inbox with all bounces being returned to Alfred Pennyworth's inbox.
