

# How do I update the Metrics for our entire account?

Last Modified on 03/31/2023 1:37 pm EDT

Applies To:  PoliteMail Desktop  PoliteMail Online  PoliteMail O365

Version:  4.9  5.0  5.05

## Updating the Account Metrics

If you are a PoliteMail Admin, you have access to the **Account Report** under Metrics, which displays metrics for your entire PoliteMail account. However, when you run it, you may notice there is no 'Update' link like there is for a Message or Campaign report.

Account Metrics will update automatically whenever any individual message report is updated.

In addition, Individual messages are updated daily automatically, and this will usually update the Account Metrics as well. However, this depends on your **Report Cache** setting. Setting a Report Cache window allows PoliteMail to run the necessary queries and cache reports in the background, so they are ready when you need them. If, for example, only a few hours are allocated (depending on your messaging volume), there might not be enough time for the archive service to get through all the messages and update the Account Report.

### Report Cache

Enable PoliteMail to use a background service to cache reports. Set the caching window below. Caching will run SQL queries nightly window, reports will be up-to-date the following morning. Most reports will seem instantaneous, as only recent reports will be run on-demand.

Start Time	End Time
<input type="text" value="8:00 AM"/>	<input type="text" value="11:00 AM"/>

All Day Weekends

## How Much Time Should I Set for the Report Cache?

This depends greatly on your messaging volume. As a best practice, we recommend a minimum 6 hours.
