

5.35.5550

Last Modified on 10/09/2025 8:55 am EDT

Version 5.35 of PoliteMail includes multi-image upload, custom font management in Beefree, faster template loading, and RTL text support. It also includes numerous small changes and fixes detailed below.

5.35
Version

Release: 5.35.5550.3900

Updates With This Release

Improvements

- **DESKTOP** **ONLINE** **M365** We've made several improvements and bug fixes to the new **two-way Entra** sync feature.
- **DESKTOP** **Message expiration** is now available on PoliteMail for the Outlook desktop!
- **ONLINE** Now you can upload multiple images at once into the PoliteMail Builder! Just use Shift-click to select a range, or Ctrl-click to select images independently.
- **ONLINE** **Manage custom fonts** in PoliteMail when using the Beefree Editor!
- **ONLINE** Dragging and dropping a Template Section will now drop it where you drag to, instead of adding it to the bottom.
- **ONLINE** Right-to-left text functionality has been added to the PoliteMail Builder.
- **ONLINE** Smart Attachments and Links are now accessible in Beefree! Create a Paragraph or Text block, click in it, and select 'PoliteMail Content' from the pop-up toolbar.

Fixes

General

- **DESKTOP** **ONLINE** **M365** Fixed an issue where Graph sending logs were not saved in the correct location.

Message Sending

- **DESKTOP** **ONLINE** **M365** Fixed an issue where messages containing a large number of Custom Fields were not being delivered.
- **DESKTOP** **ONLINE** **M365** Fixed an issue where Scheduled Sends via Graph were not sending due to an expired delegated token.
- **DESKTOP** **ONLINE** **M365** Fixed an issue with sending via Graph where Suppress Auto-Replies could not be disabled.
- **ONLINE** Fixed an issue where SVG files added to Beefree were rendering too large in Outlook.

PoliteMail / Beefree Editor

- **DESKTOP** Fixed an issue where Template content was being removed when a button is added.
- **ONLINE** Fixed an issue where SVG files added to Beefree were rendering too large in Outlook.
- **ONLINE** Fixed an issue where Drafts were failing to auto-save when using Beefree.
- **ONLINE** Fixed an issue where Users or Managers were unable to save an item as a new Section.

- **ONLINE** Fixed an issue with an excessive loading time when loading a Template in Beefree.
- **ONLINE** Fixed an issue where the user is prompted to save a message as a new Draft if the Builder was closed and re-opened.
- **M365** Fixed an issue where very large Templates were not loading.

Metrics & Reporting

- No bugfixes have been made with this release.
