

What are the capabilities of the PoliteMail Sandbox?

Last Modified on 10/20/2025 1:55 pm EDT

The PoliteMail Sandbox will give you access to ALL PoliteMail features in both PoliteMail Online as well as PoliteMail for the Outlook desktop.

While you have access to all PoliteMail features, there are some differences between it and the full integration of PoliteMail:

- You will not be able to send to a large number of recipients.
- Your address book will not pre-fill with your distribution lists you already have.
- The email address you send from is fixed as comms@politemail.com. This means that images will not automatically download as the sender email address is not from a recognized domain.
- Syncronym is not available in the PoliteMail Sandbox.
