

Using PoliteMail with Translator for Outlook To Display Messages in Multiple Languages

Last Modified on 11/25/2025 10:45 am EST

PoliteMail works with the Translator for Outlook add-in to convert PoliteMail messages into different languages. You can download Translator for free from the Microsoft store by

Once the add-in has been installed, you will see a button in your Outlook ribbon.

Click on the message in your inbox you want to translate, and then click the Translate Message button. A drop-down menu will appear of available languages. Choose the language and the message will be translated.
