

Grant PoliteMail Access to Azure Resource Group

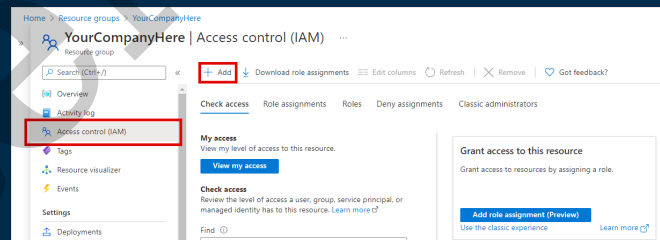

Last Modified on 06/02/2026 10:21 am EDT

Applies To: ■ PoliteMail Desktop ■ PoliteMail Online ■ PMUA ■ PoliteMail M365

Version: ■ 4.9 ■ 5.0 ■ 5.1+

You can skip this step if your in-house technicians will take care of it, but you can optionally give PoliteMail access to the Azure resource group so that PoliteMail technicians can create the needed resources for deployment.

1. Navigate to your newly created resource group (created from configuring the BYOC setup) via the Azure home page at **Home > Resource groups**.
2. Open your created resource group.
3. Click **Access Control (IAM)**.
4. Then click **Add** to add a new role assignment.
5. Set the role as Contributor.
6. Under Select, type in the name of your new app registration.
7. Click **Save**.

Add role assignment ×

Role ⌵
Contributor ⌵

Assign access to ⌵
User, group, or service principal ⌵

Select ⌵
Search by name or email address

Selected members:

| | |
|---|------------------------|
|  AccessToYourCompany | Remove |
|---|------------------------|

[Save](#) [Discard](#)

The app registration you just created gives Contributor access to this specific resource group. Now PoliteMail will have admin access to that resource group, allowing PoliteMail technicians to use that app registration to create the resources needed for deployment.

If the creation process was successful, you will now see your new created role under 'Role assignments' on the IAM screen.
