## COM Add-In vs Outlook/Modern Add-In

Your browser does not support HTML5 video.

COM Add-In	Outlook (Modern) Add-In
Specific to Windows computers	Works on both Windows and Mac
Supplemental program that runs at startup of Outlook	Consists of a manifest that describes how the add-in integrates into Outlook, as well as JavaScript/HTML code.
Are downloaded .dll or .exe files that are installed on your PC	Are downloaded .json files that are installed on your device

Outlook add-ins are different from COM or VSTO add-ins, which are older integrations specific to Outlook running on Windows.

PoliteMail does not use any VSTO add-ins.
