## How can I remove Measurement for a specific link or smart attachment?

Last Modified on 10/20/2025 12:04 pm EDT

This same process also works for Smart Attachments.

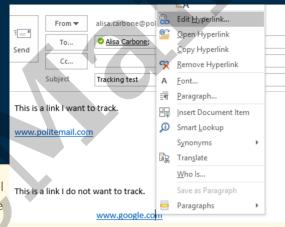

If you would like to enable PoliteMail tracking on a message, but would like certain links to NOT be tracked, simply add? notrack=true to the end of the URL.

After you've inserted your links into your email, **right-click** on the hyperlink and choose **Edit Hyperlink**.

Now add ?notrack=true to the end of the URL in the Address field.

Exception: For Microsoft Teams Meeting links, you will need to use &notrack=true instead (note the use of the ampersand (&) instead of a question mark (?)).

When you look at the results, you will see that the PoliteMail link has been tracked, but the Google link has not.
