

# Speed Up Large Sends with Aggregate Measurement

Last Modified on 06/02/2026 10:33 am EDT

## Sending to Large Lists with Aggregate Measurement

Applies To:  PoliteMail Desktop  PoliteMail Online  PMUA  PoliteMail M365

Version:  4.94  4.97  5.x

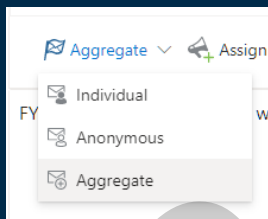

The process below will skip list expansion and send a single email to the SMTP endpoint.

For large lists this will result in the message being delivered faster than if it was sent using individual or anonymous modes with list expansion enabled.

1. Disable all list expansion at **Settings > User Preferences**

List Expansion Methods Enabled <a href="#">?</a>		
	Client	Server
EWS	<input type="checkbox"/>	<input type="checkbox"/>
Graph	<input type="checkbox"/>	<input type="checkbox"/>
MAPI	<input type="checkbox"/>	<input type="checkbox"/>

2. Compose the message and send in

3. Update the sent count in **Results > Messages**
