5.35.5690

Last Modified on 12/29/2025 3:23 pm EST

This release is a minor update with stability and usability enhancements, especially with larger sends over 100k.

Release: 5.35.5690

Updates With This Release

Improvements

- `ONLINE` Performance for sending large (100k+) messages has been significantly improved.
- `ONLINE` The default width of a message when using Beefree has been expanded from 500px to 640px.

Fixes

Message Sending

- `M365` Fixed an issue where large messages of several MB could not be created.
- `ONLINE` Fixed an issue where an invalid warning displayed when accessing the Address Book via Graph Client.

PoliteMail Builder/ Beefree Editor

- `ONLINE` Fixed an issue where pre-made Beefree Templates could be overwritten.

Metrics & Reporting

- `DESKTOP` `ONLINE` Fixed an issue where the Segmentation Metrics button was not functional.
- `ONLINE` Fixed an issue where Campaign Metrics reports would not send via Graph when Graph was set as the default send method.
