5.40.6102

Last Modified on 03/30/2026 8:17 am EDT

PoliteMail 5.4 introduces some major customer-facing enhancements as well as customer-requested refinements!

Release: 5.40.6102

Updates With This Release

New Features

- **DESKTOP** **ONLINE** **M365** The PoliteMail Unified App (PMUA) delivers the PoliteMail Online user interface across ALL Outlook clients (Desktop or 365) via a one-time Microsoft 365 admin manifest deployment, for a consistent experience on any platform!
- **DESKTOP** **ONLINE** The Analytics Overview provides high-level metrics of your sends without having to run a full Metrics report!
- **DESKTOP** **ONLINE** **M365** Have greater personalization than ever! Dynamic Content is now supported to allow messages to display different sections per audience based on data-field conditionals. This works best in Beefree but can be done in any interface using Liquid Syntax.
- **DESKTOP** **ONLINE** **M365** A live data connector is now available to use the Advanced Analytics Dashboard more easily than ever, using OAuth instead of a PAT!

Improvements

- **ONLINE** **PMUA** Templates saved in Beefree can now be exported as HTML!
- **DESKTOP** **ONLINE** **PMUA** **M365** GCC support has been added for delegated Graph client sends.
- **DESKTOP** **ONLINE** **PMUA** **M365** Custom headers are now supported when sending via Graph.
- **DESKTOP** **ONLINE** **PMUA** **M365** The interface for setting Tags has been improved and refined.
- **DESKTOP** **ONLINE** **PMUA** **M365** Improved support for Template Sections when using a Mac and Firefox.
- **DESKTOP** **ONLINE** **PMUA** **M365** Users that open a Template that contains a From address they are not authorized to use are prompted to change the From, and this is retained when saved.
- **DESKTOP** **ONLINE** **PMUA** Sent messages will now display in the Calendar View and link to the Metrics Report.
- **DESKTOP** **ONLINE** **PMUA** A setting has been added for Admins to set if recipients are saved with Templates or not.
- **DESKTOP** **ONLINE** **PMUA** A setting has been added for Admins to toggle visibility of the Restore/Archive buttons in a Metrics report.
- **DESKTOP** **M365** An option to show or hide the password has been added.
- **ONLINE** The option to open a message in PoliteMail365 can now be toggled by Admins via an app setting.

Fixes

General

- **DESKTOP** **ONLINE** **PMUA** Fixed an issue where the Graph login dialog appeared when users tried to access their preferences.
- **M365** Fixed an issue where the default Send Method was not shown correctly.

Message Sending

- **DESKTOP** **ONLINE** **PMUA** **M365** Fixed an issue where the retry logic was not working when doing large volume sends via Graph.
- **ONLINE** **PMUA** **M365** Users that open a Template that contains a From address they are not authorized to use are now given a dialog alerting them that they do not have permission.
- **ONLINE** **PMUA** Fixed an issue where messages that contained a OneNote link, composed in Beefree and sent via Graph failed to send.
- **M365** Fixed an issue where low-priority messages were not sending.

PoliteMail Builder/ Beefree Editor

- **ONLINE** **PMUA** Fixed an issue where Template Sections were not rendering properly and joystick buttons would not function when using Firefox on a Mac.
- **ONLINE** **PMUA** Fixed an issue where deleting a duplicated Template Section with text from html added to it resulted in an error.
- **ONLINE** **PMUA** Fixed an issue where content shared with all users displayed the Owner as Undefined instead of All Users in the Builder.

Metrics & Reporting

- **DESKTOP** **ONLINE** **PMUA** Fixed a issue where the Grade Level was incorrect if using an Opt-Out footer.
- **DESKTOP** **ONLINE** **PMUA** Fixed a issue where opting not to process Sends when running a Campaign report resulted in the Campaign ID showing as 'undefined'.
