# Sharing Content in Beefree

Last Modified on 10/01/2026 4:13 pm EDT

**Applies To:** ■ New PoliteMail ☐ Legacy PoliteMail

**Version:** ☐ 5.0 ☐ 5.1 ☐ 5.2 ■ 5.3+

## Templates

Similar to PoliteMail, users can access their own Beefree Templates, as well as any that have been marked as Shared. Managers have access to any Templates in their Business/Region, and Administrators can access all Templates.

## Rows

All Saved Rows in Beefree are shared with all other users, regardless of the folder saved in (even 'My Saved Rows'). This is by design by Beefree; there is no option to make a Saved Row private or restricted to specific users, like you can with the PoliteMail Builder.

## Content

| Item | PoliteMail to Beefree | Among Beefree Users |
|---|---|---|
| Smart Attachments Links | Items marked as Shared in the Content grid can be accessed. To do so, create a Title, Paragraph, List, or Text block and click the 'PoliteMail Content' button in the floating toolbar when you click in the text. | n/a; Beefree does not have its own Smart Attachment or Link content blocks. |
| Images | Images in PoliteMail cannot currently be accessed in Beefree; Beefree has its own Image storage. If necessary, you can temporarily create a message in the PoliteMail builder to get the HTML for it, and copy the HTML into an HTML block in Beefree. | Images uploaded into Beefree are accessible by all other Beefree users, even if stored in their own folders. |
| Paragraphs | Paragraphs are not shared between PoliteMail and Beefree. You can easily copy and paste the text into a corresponding Block in Beefree and save the Row instead. | Paragraphs cannot be saved in Beefree; to share it with other users, save the Row. |
| Brand Themes | Beefree does not support Brand Themes and so they cannot be imported. | n/a |
