PDF Export

Last Modified on 10/01/2026 4:13 pm EDT

Applies To: ■ New PoliteMail ☐ Legacy PoliteMail

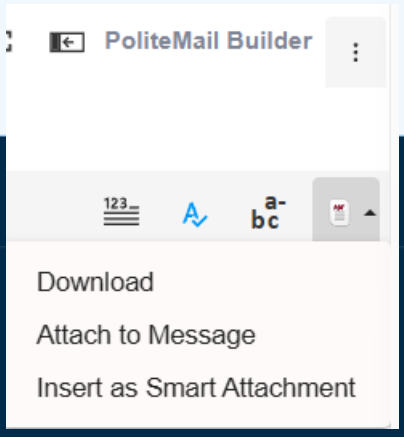

Version: ☐ 4.9x ☐ 5.0 - 5.4 ■ 5.45+

As of version **5.45.6326**, PDF export capability in PoliteMail Online has been upgraded to not only create better PDFs, but also allow you to easily create a PDF of the message and include it as an attachment or Smart Attachment!

Available in PoliteMail Online/PMUA only, the PDF Export will work with both the PoliteMail Builder as well as Beefree.

If you do not see the PDF Export button in the toolbar of the PoliteMail Builder, click the kabob button (the three vertical dots) on the far right of the toolbar. This expands the toolbar to show additional buttons.
