

Enabling compatibility mode

Last Modified on 05/26/2026 10:32 am EDT

Applies To: PoliteMail Desktop PoliteMail Online PMUA PoliteMail M365

Version: 4.9 5.0 5.1+

On rare occasions, you might receive a dialog that asks if you would like to enable Outlook compatibility mode to ensure proper display of PoliteMail on your screen. This is usually due to having an older or low-resolution monitor, and will force Outlook to run as if it were on an older version of Windows.

If prompted if you would like to enable compatibility mode, click 'Yes' and restart Outlook.

You can also manually enable compatibility mode by right-clicking on the Outlook file (or a shortcut) and going to Properties > Compatibility.
