

# 5.45.6326

Last Modified on 06/16/2026 11:09 am EDT

This update to PoliteMail 5.45 adds a few new features in addition to other smaller updates and bugfixes.

Version  
5.45

## Updates With This Release

### New Features

- **DESKTOP ONLINE PMUA** Metrics reports now have the ability to export as a PowerPoint file (.pptx).
- **ONLINE PMUA** The **Download as PDF** feature allows users to quickly download a message as a PDF, attach the generated PDF automatically, or insert it as a Smart Attachment, all from one button in the toolbar.
- **ONLINE PMUA** An HTML Import button has been added in the PoliteMail Builder to more easily paste received HTML formatted content.
- **ONLINE PMUA** **Content Block Style** allow you to change the default look of Content items in Beefree when you drag the Content block to the message. This allows you to more easily align with your organization's brand standards without a Brand Theme.

### Improvements

- **DESKTOP ONLINE PMUA** A 'Contain' and 'Does Not Contain' filter option has been added to the Subject column of the Messages list.
- **ONLINE PMUA** A "Mine" and "Shared" option has been added at the top of Content lists in the PoliteMail Builder panel, in addition to "Recent" and "Alphabetic", to find your Content items more quickly.
- **ONLINE PMUA** A "Reset" option has been added under the avatar in the upper right, providing a nice fast way to clear local app data, the browser cache, and cached Graph credentials all at once.
- **ONLINE PMUA** The setting to set whether or not to embed all images in a message now applies to Beefree messages as well.

### Fixes

#### General

- **DESKTOP ONLINE PMUA M365** Fixed an issue where creating a Draft from another Draft caused only the original Draft to display.
- **DESKTOP ONLINE PMUA** Fixed an issue where Opted Out contacts were not included in a Mailing List or Count following an Import.
- **ONLINE PMUA** Fixed an issue where the image url was showing in the preheader.

#### Message Sending

- **DESKTOP ONLINE PMUA M365** Fixed an issue where the 'Override Preflight Interval' setting was not working.

- **DESKTOP ONLINE PMUA M365** Fixed an issue where a Message would not send unless all images were removed.

#### PoliteMail Builder/ Beefree Editor

- **ONLINE PMUA** Fixed an issue where [redacted] were unavailable after updating a saved Template.
- **ONLINE PMUA** Fixed an issue where making changes to a Message caused Beefree to refresh regularly.

#### Metrics & Reporting

- **DESKTOP ONLINE PMUA** Fixed an issue where deleting all Messages from a Campaign deleted the Metrics reports of the individual Messages as well.
- **DESKTOP ONLINE PMUA** Fixed an issue where adding the 'Sender' column to the Messages list was not working.
- **DESKTOP ONLINE PMUA** Heatmaps now display on Metrics reports for messages sent using Beefree.
- **ONLINE PMUA** Fixed an issue where viewing Metrics on a Campaign report with a large volume of sends caused PoliteMail to freeze.
