

# 5.45.6406

Last Modified on 07/27/2026 9:17 am EDT

This update to PoliteMail 5.45 adds a few new features in addition to other smaller updates and bugfixes.

Version  
5.45

## Updates With This Release

### New Features

- **DESKTOP** **ONLINE** **PMUA** **PMUA** now works with Filtered Lists as well - no more waiting for IT to update a list in your Outlook address book! Note this is a paid additional feature.
- **ONLINE** **PMUA** Add **PMUA** to your message to appear in your recipients' Inboxes to drive readership higher!

### Improvements

- **DESKTOP** **ONLINE** **PMUA** **PMUA** Add multiple Campaigns into one!
- **DESKTOP** **ONLINE** **PMUA** **PMUA** When viewing the sub-reports on Opens or Didn't Opens, the subject of the Message displays in the breadcrumbs at the top of the report for easier reference.
- **DESKTOP** **ONLINE** **PMUA** **PMUA** Added an option to sort the Custom Fields list by data type.
- **DESKTOP** **ONLINE** **PMUA** **PMUA** Added an option to sort Smart Attachments in the grid by URL or tag.
- **DESKTOP** **ONLINE** **PMUA** **PMUA** The 'Workspace Settings' preferences section is now available for Admins instead of System Admins only. Great for installing **PMUA**!
- **DESKTOP** **ONLINE** **PMUA** **PMUA** A setting has been added under **User Preferences > Sending** to set a default From address.
- **ONLINE** **PMUA** **PMUA** A new button has been added to the toolbar to import an HTML file directly in the PoliteMail Builder!
- **ONLINE** **PMUA** **PMUA** The 'Save As' button has been streamlined and the 'Save Current' option removed.

### Fixes

#### General

- **DESKTOP** **ONLINE** **PMUA** **PMUA** Fixed an issue where white space and an auto-scaling button appeared above a Template for the recipient when viewed in the new Outlook.
- **DESKTOP** **PMUA** Fixed an issue where extra spacing displayed when using the 'Enter' key to create spaces when using the PM365 add-in in classic Outlook.

#### Message Sending

- **ONLINE** **PMUA** **PMUA** Fixed an issue where overriding the word count would cause an error on a Preflight Test Send.
- **DESKTOP** **PMUA** Fixed an issue where the HTML for the image beacon displayed when doing a Preflight Test Send sent via Graph.
- **DESKTOP** **PMUA** Fixed an issue where attachments did not display when opening the Message from the

Scheduled Sends grid.

### PoliteMail Builder/ Beefree Editor

- **ONLINE** **PMUA** Fixed an issue where bold, italics, or underline formatting were not supported for Links in the PoliteMail Builder.
- **ONLINE** **PMUA** Fixed an issue that prevented a currently open Template in Beefree from being deleted.
- **ONLINE** **PMUA** Fixed an issue where links were a different color depending on if you used the link button or inserted a PoliteMail Link in the floating toolbar.

### Metrics & Reporting

- **DESKTOP** **ONLINE** **PMUA** Engagement Rate has been added as a column header option with viewing the Campaigns grid.
